

THE ULTIMATE SAFE MONEY GUIDE

How many times have you been scammed before ?

I'm guessing the answer is at least a few...

There are a lot of guides out there promising you'll make a million bucks, you'll buy your dream house or car in no time, get beautiful women chasing you down the street and so on and so on...

They are all scammers that want you to lose money !

Every time you lose more money they're getting more money off your losses !

That's why I made this guide.

I fell to a few of those scams myself and I got sick of it.

So, I've decided to gather all the information I can about how a person can really make money online.

I found that the best way to make money online was through the gambling world.

This was shocking to me, because I've never been to a casino before and I can't even imagine spending or (should I say throwing) my and my wife's savings on a game of chance.

After a lot of reading and some extensive research I found some guides that truly gave me the chance to earn a living from gambling.

To be more specific - from playing the online casino's roulette table.

I've tested all the techniques and tools I suggest in this book and can safely say that you'll win more than you'll lose. Not losing is something a scammer would say, and that's not possible. But, if you'll lose \$1000 one day and win \$300 every next day (for let's say 10 days) you're still ending up with \$2000 of profit.

I want to share with you what I have come to realize and the ways you can do it too.

I hope that by the time you'll finish reading and implementing the techniques and have used the tools these books are offering you'll have at least a couple of hundreds bucks more in your bank account.

I hope you'll enjoy reading my guide (I know I enjoyed writing it). And most important - HAVE FUN !

Remember, all the material in this guide is taken from all over the web.

I checked out sites like

www.rouettesniper.com

www.roulettekiller.com

www.roulette-cheat-guide.com - one great site (click to visit)

And many many more...

I did testing of all the steps and used all the tools I'm offering in my guide.

Some of the stuff you'll see here you already know, and I bet that you've dismissed it more than once thinking this kind of thing can't work. Well, I'm here to tell you - you're wrong.

I've recently saw the movie called "The Secret" (great movie by the way, recommending it to everyone).

Anyway, in the movie you see how things happen only by believing in them.

Of course, I'm not suggesting you start believing you have a million dollars and they will appear, but I do suggest that if you put your trust in something and try to invest in something that has little significant for you (like \$100-\$300 or an hour a day) and and you won't dismiss it and it will not cause you inconvenience in any way, you might be amazed by the rewards you'll start to get.

For instance, almost all the techniques and all the tools in my guide will tell you that you're required to deposit a small amount of money (relatively speaking) in order to generate more.

This concept is only logical and it works all around the business world whether it's real estate, opening your own restaurant, playing the stock market etc.

The only way you can be sure you'll never lose money is by doing nothing. If you want to make money you must spend it first - that's the way it goes.

The best thing I came to realize about the gambling world is that the investment (and that's exactly what it is) is very very small. I found that by investing some money you can double it almost immediately and with the techniques and tools in this book you'll see how you can keep generating a steady predictable income for life (or at least until there will be some law against it ;-).

I'm not suggesting you quit your job or anything (like those scammers) just take a chance on something.

The worst that can happen is you'll lose a couple of hundreds, but what if you'll win...?

Read my guide and think about it.

Congratulations - You really do want to make easy money!

The Golden Rule - Don't Be Lazy

If you want to actually make money, you have to get started. Get started NOW. Don't put this off until tomorrow, or the next day, or else you will forget about it. You will not have achieved anything, and you will be left searching for other ways to make money. START NOW!

Please remember, you should follow these instructions and what this guide tells you to do every step of the way. Deviation, no matter how small or trivial, can throw this whole system off course. DO NOT attempt to use this guide and its content unless you can follow simple instructions. Please read all these instructions before attempting to do anything.

About The Game

You are going to use my guide to beat the odds on the roulette table. It's very simple, and it works. All you have to do is follow the instructions provided, and you will come out a winner.

A quick note for you as well – I came across a many similar systems and decided to give one a try, as I knew there was nothing to lose. After playing the system - and winning - I became convinced that this is something other people can use, so I decided to write down my experience to let all of you this guide and the tools I've used and worked for me and that you are now going to use today.

The Law Of Averages

Roulette is based on the "Law of Averages", minus one or two points. In theory, the average bettor is usually betting against this law. This way, the Casino can only gain money from you playing the table, because you don't know how to predict on what to bet. UNTIL NOW!
This guide along with the softwares takes this "Law of Averages" and kicks its ass out the window. It almost guarantees you a winning spin every time you bet.
Please keep in mind that you are not using your own money - you are using the casino's money.
More on this later...

Safe Betting - Two Things To Know

First, to practice safe betting at online casino's you have to be patient. If you are patient with the way my software calls bets, then you can rest assured that you will always win.

Also, don't let the simplicity of the techniques and softwares fool you. It will win you money.

Second, keep in mind you are not using your own money - you are using the casino's money.

The casino that I will be recommending to you has a "100% Matching Bonus".

This bonus is the money you will be playing with. If you were to lose the entire bonus, your money has not yet been touched, and you can withdraw it from the casino, leaving absolutely zero risk to you (unless you can't control yourself ;-).

Now on with the show...

Make sure you TRY this using PRACTICE PLAY before you deposit money.

First of all, you have to install the recommended casino's software.

The download and installation are explained in details on the following pages

888

Casino-on-Net

ABOUT Casino-on-Net

Casino-on-Net was launched in May 1997 and is offered in 11 different languages. It is available on two platforms, allowing new members to choose either a download or a non-download version. The download version offers a more comprehensive gaming experience and quicker access to **Casino-on-Net** on subsequent gaming sessions whereas the non-download version offers the advantage of quicker initial access and addresses potential concerns of some prospective members about downloading software from the internet.

Casino-on-Net offers a variety of traditional casino products such as blackjack (available also in multi-hand version), craps, roulette, baccarat, keno and various types of poker, including Pai Gow Poker, Caribbean Poker and Power Poker, where 888 Holdings acts as the "house". It also has 15 slot machines (five of which have progressive jackpot features), six video poker machines (one of which has progressive jackpot features) and a Pachislo Deep Ocean slot machine. A variety of stakes are offered, from US\$0.25 up to US\$1,000 games.

Casino-on-Net also features private tables, multi-member tables, private group tables and VIP tables. There are also two playing modes for users to choose from, namely a practice play mode and real money play mode.

The Following process may seem to take a long time but it's really less than 5 minutes

ATTENTION: ALL THE LINKS IN THIS GUIDE WILL OPEN A NEW WINDOW - MAKE SURE YOUR POP-UP STOPPER DOESN'T PREVENT IT FROM OPENING.

The first thing you want to do is download the casino software. You can do this by [clicking here](#) or on this banner

A screenshot of the 888.com website interface. The page is divided into several promotional tiles. In the top left, there's a '100% BONUS' offer for Pacific Poker. In the top right, there's a '100% BONUS' offer for Casino on Net. A central pop-up dialog box is overlaid on the page, with the title bar 'www.888.com' and a close button. The dialog box contains a question mark icon, the text 'Click ok to download our free Casino while browsing the site', and two buttons: 'Ok' and 'Cancel'. The 'Ok' button is circled in red. The background tiles include 'download POKER', 'download CASINO', '888sport', '888ladies', and 'PLAY bingo'.

Once you're in the 888.com site you'll get a pop-up message asking you to download the casino software. Go ahead and click on OK. If the pop-up doesn't show simply click on "Download Casino" , that is located on the upper right square (colored in orange)

Download Casino-on-Net in 3 Easy Steps

This quick start page will guide you through our fast and easy download and installation process. For more detailed instructions, please visit our [Getting Started](#) section.

888.com does not allow anyone more about 888.com's initiatives

- 1 > Download**
 - A dialog box appears.
 - Click on **Run** and follow the installation process. Depending on your internet speed, this may take a few minutes.
 - If the dialog box does not appear, restart the download.**
 - You can also contact our [Member Support](#) for assistance.

- 2 > Installation**
 - Installation will start in the background.
 - Follow the prompts to complete installation. Once completed, the 888.com software will open on your screen.
 - If the dialog box does not appear, click on "Installation" to restart the download process.**
 - You can also contact our [Member Support](#) for assistance.

- 3 > Register for an Account**
 - Click on Money Play.
 - A registration form will appear. Enter the requested information and accept the Terms & Conditions.
 - Log in with your username and password.
 - Make your first deposit and get your Welcome Bonus!
 - If you are unable to register or encounter any other problems, please contact our [Member Support](#).**

Once you hit the OK button you'll be redirected to the download page and another pop-up will show asking you to Run or Save the casino software installer. You want to click on the Run button. (you can also click on "save" but you really have no need for having the installer on you computer all you need is the software itself and not the installer).

Download Casino-on-Net in 3 Easy Steps

This quick start page will guide you through our fast and easy download and installation process. For more detailed instructions, please visit our [Getting Started](#) section.

888.com does not allow anyone more about 888.com's initiatives

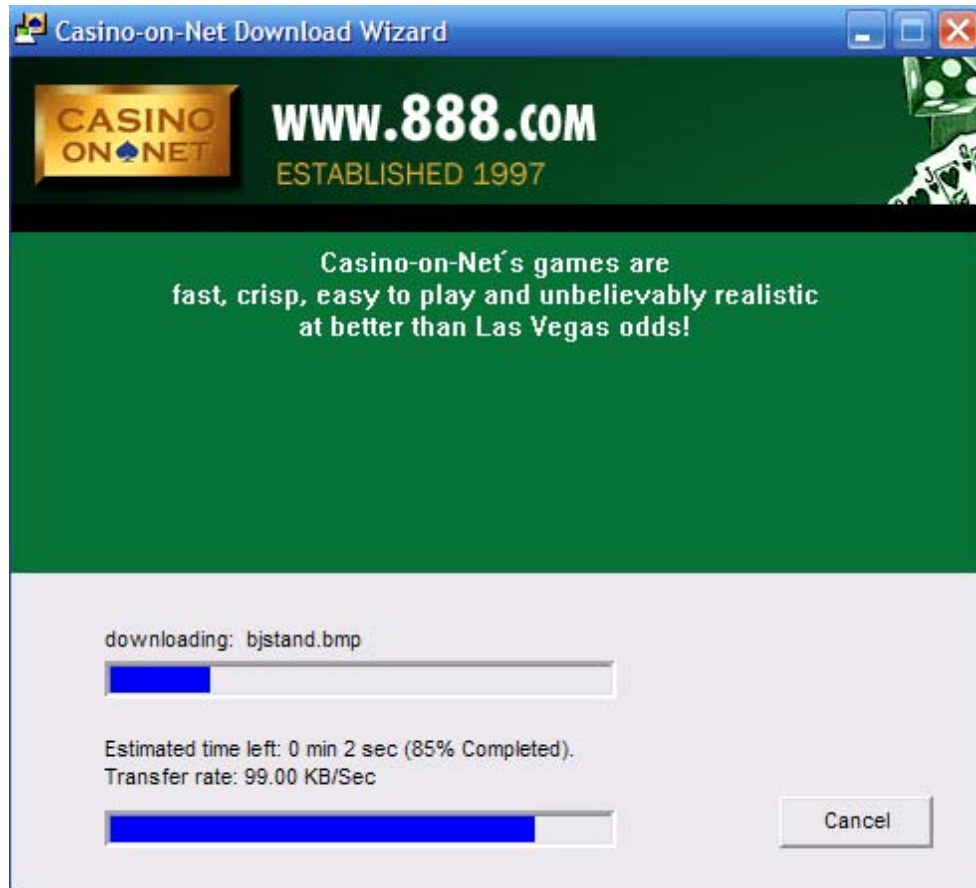

- 1 > Download**
 - A dialog box appears.
 - Click on **Run** and follow the installation process. Depending on your internet speed, this may take a few minutes.
 - If the dialog box does not appear, restart the download.**
 - You can also contact our [Member Support](#) for assistance.

- 2 > Installation**
 - Installation will start in the background.
 - Follow the prompts to complete installation. Once completed, the 888.com software will open on your screen.
 - If the dialog box does not appear, click on "Installation" to restart the download process.**
 - You can also contact our [Member Support](#) for assistance.

- 3 > Register for an Account**
 - Click on Money Play.
 - A registration form will appear. Enter the requested information and accept the Terms & Conditions.
 - Log in with your username and password.
 - Make your first deposit and get your Welcome Bonus!
 - If you are unable to register or encounter any other problems, please contact our [Member Support](#).**

The last thing you need to do for this stage is to hit on Run again once the security warning pops-up. Please check and verify that the publisher is 888 Holdings Plc as seen here :

Please wait a moment while the casino is being downloaded.

This ends the downloading part and the casino installation begins. The next couple of page will guide you through the installation process and will explain exactly how to set up your new money making account.

Click on 'Next' to complete the installation.
When the installation completes, run the casino software.

Select 'Money Play' to get started. You can select 'Practice Play' if you wish, but you will not get your matching bonus, and you will not make any money. If you want to build your confidence in the techniques and / or softwares, then choose 'Practice Play'. I recommend you choose 'Practice Play' and wager \$6 on the five dollar tables so you can get a good feel of the potential this guide and tools can make you.

Register a 'Money Play' account so you can get your matching bonus.

888.com CASINO ON+NET **Money Play**

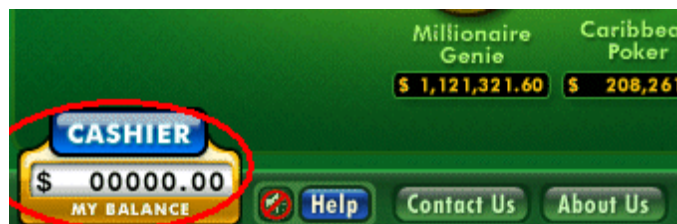

Username

Password

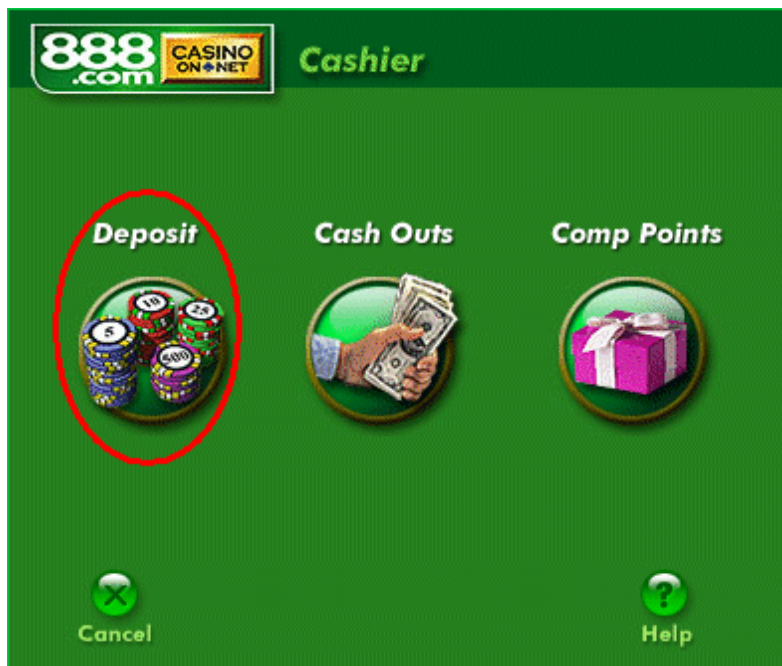

Nickname (optional)

[New User? Sign Up Here!](#) [Forgot your Password?](#)

You can now log in to your 'Money Play' account.
The casino will send you a password to your registered email account.

Click on 'Cashier' on the lower left corner of the screen.

Click on the 'Deposit' graphic.

Amount in US \$:

Credit Card Type: Security Code: ?

Credit Card Number:

Expiry Date (MM/YY):

Cardholder's name:

Billing Address:

City: Zip Code:

Country:

Present Location:

Telephone:

Your Credit Card charge will be posted as: 'I-Fund Intersafe Global', 'Intersafe Global' or 'Cassava/Intersafe'.

You can also deposit by Credit Card Via: [Fax](#) or: [Telephone](#)

This is where you actually deposit your money.

I highly recommend that you deposit \$200 because that is what the casino will match you on.

You also need to start with this much for the betting to properly work. If you feel that \$200 is too much, then you should put at least \$100 in to start, but you are also reducing your matchup bonus and it will take you longer to build up you bankroll (it doesn't really matter you'll make the money I just like sooner...)

I highly recommend that you leave that money in your account as the casino software has a tendency to be more favorable to accounts that keep their deposit.

As I have said before, You will not put any of your money at risk!

At this point your are set up and ready to start playing. Once you are done adding money to the Cashier, you will be taken to the Casino Lobby. Click on the Roulette icon.

Select 'Private Table'.

Select 'Standard'.

We are betting on all area's of the table. Some area's include Dozens (3rd 12, 2nd 12, 1st 12), the Rows (any 2 to 1) and all the Even bets (Red/Black, Odd/Even).

There are also Line bets, Trio bets, and Split bets.

The Roulette Sniper and Roulette Killer tools keep track of all numbers that come up during a session and calculates the best time to bet. Both tools will tell you to bet when it feels that there is a good chance of a win for you.

If you lose on that bet, they will tell you to bet again, until you win (which you absolutely will).

But before going through these great tools I want to build your confidence in me so I'm going to show you how you can make about \$144 in around half an hour or so... check out the guide on the next page.

This is the first and only time I will ask you to trust me and to deposit your own money in the interest of trust. I need you to trust what I'm saying here is true and unless you take that first step that can't happen. So, please read the guide on the next page and make sure you understand it completely. If it will make sense to you (like it did me when I first found it) deposit the money and I guarantee you won't be sorry.

If you think you trust me already, let me remind you something - I can be a scammer too.

The truth is you don't know me and I can be that guy that is trying to earn from your losses.

That's why it's crucial that you read and understand the following technique thoroughly and only try implementing it once you're sure you've got it and that you trust the logic of it.

If and when you'll trust the logic of that technique, try it and as I said - you'll make the money I guaranteed, then you can trust me that all the other techniques in this guide and all the tools and all the recommendations I suggest including where and when to do it - all of it is true and you can trust me on that. Plus, the benefit is that once you trusted me you've made your initial money and thus you'll start trusting yourself and that will lead to your success (and also you now know that from now on that really isn't your own money you'll be "risking" it's the casino's money.

One last peace of advise : after trying it and making you first money be sure to do it at each and every casino on the list at the end of this guide.

You can only do this once at each casino but you have about 14 of those so you can make something like $\$144 \times 14 = \2016 in about 30 minutes per casino.

So, that's \$2016 in a total of 7 hours (not bad for a day's work, not too bad at all)

But start with one and build your confidence first.

Go on I know you can see the next page and you can't wait to read it...

[CLICK HERE TO GO TO OUR ONLINE CASINO CHOICE](#)

Quick Roulette Guide

Quick guide on how to make \$143 (£80) within 30 minutes.

Many online casino and poker websites offer 1st Deposit bonuses. This is given as an incentive for you to make a deposit and then spend money on their website. There is one flaw with most of these as you are required to bet a certain amount to receive this extra money.

The next few lines will explain how to use this to your advantage and cash out your bonus without risking any of your own money by playing online roulette on **THIS CASINO** - Our Number One Choice!

We've tested the casino and found the system to work flawless on it.

By clicking on **THIS LINK**, you will get a 100% bonus of up to \$200 when you make your first deposit. Therefore if you deposit \$200, you will receive a \$500 bonus which is immediately credited to your account for your gambling pleasure.

This bonus can only be withdrawn as cash into your bank account once you have staked 10x your bonus which in the case of a \$200 bonus, would be \$2000.

This seems like a lot of money. This casino also doesn't count bets on red or black towards the 10x stake so therefore I had to think of an alternative way to cash out this bonus without risking my own money. They do however count bets on all the numbers (0-36) in the 10x stake.

Therefore by betting \$3 on each number you are betting $37 \times \$3 = \111 each time and losing \$3 as each time you are winning $36 \times \$3$ back.

If we do this 19 times we will have staked over \$2000 and only lost $19 \times \$3 = \57 of our deposit. Therefore leaving us with \$143 of our bonus intact! (there is a button called repeat bet which you can keep pressing, therefore you don't have to do each bet from 1 to 36 and 0 individually time and time again!).

So by depositing \$200 and playing 19 spins in the way I have described above, you will walk away with \$343 cash profit for less than 30 minutes work! That means you'll **walk away with a \$343** in total when you only **started with \$200 !!!**

If you haven't done so already [CLICK HERE](#) to download the casino software and install it.

YOU HAVE A MORE TOOLS AND INFORMATION ON THE FOLLOWING PAGES WITH STEP BY STEP MONEY MAKING INSTRUCTIONS.

Roulette Sniper - [DOWNLOAD THE TOOL FOR FREE FROM HERE](http://www.p2pheaven.com/rouettesniper.html)

If for some reason you can click on the link go to <http://www.p2pheaven.com/rouettesniper.html> and the download will start automatically.

Roulette Sniper Review: What is Roulette Sniper?

Here is the deal about **Roulette Sniper**. Its a roulette system that claims it can help you win at roulette more consistently using it. Unlike many other roulette systems, roulette sniper is softwre based.

I first learned about **Roulette Sniper** from an online gambling forum. Many of the members talked highly about it so I decided to check it out and see if the hype lived up to its claims and jargon plastered all over the sales page.

The first thing I did was try it out. They believe in their software so much they allow you to try it out before you buy it.

The **Roulette Sniper** trial software is a limited edition of the full version, but has enough features unlocked to test the software. I also should mention the trial software locks up after an hour of play. So I downloaded it and tried it out at a real casino. I only bet \$1 per bet and played for the entire hour.

So What Happened?

Well I have to admit I was impressed. After about 1 hour of play I made enough money to purchase the the program.

That got me excited and I decided to purchase it right away.

How Does Roulette Sniper Work?

So sum up what **Roulette Sniper** is, its basically a roulette bet tracking application. The software tracks roulette spins and tells you when and where to bet based on the program settings as well as predefined user preferences.

The system is for more conservative roulette players, but it works better than you think and beats manual tracking.

You run this application while your playing roulette and input your previous results. You spin without bets until the software alerts you of an betting opportunity.

This allows for low risk and the system does follow a hydrate progressive betting strategy.

How Much Can You Win With Roulette Sniper?

Well gambling is still gambling and comes with risk of losing, But with **Roulette Sniper** your making small gains with less risk and overtime you can build up your bankroll. The software comes with some cool safety options that alert you when its time to switch tables or stop playing, if your having a losing streak.

In my opinion roulette sniper is a must have. Its been working well for me.

Go try it out the and see what happens.

[CLICK HERE TO DOWNLOAD ROULETTE SNIPER](http://www.p2pheaven.com/rouettesniper.html)

When the software starts up, it will look like this. First you will need to choose your Play Style.
If the button in Play Style says 'More »', then click it to get the Advanced Settings.

Play Style allows you to set up how you want RouletteSniper operate. The first section is all the betting types RouletteSniper supports.

- **Even** pays 1:1 • **Dozen** pays 2:1 - Works on the 1st 12, 2nd 12, and 3rd 12
- **Row** pays 2:1 - Works on Rows 1 - 3 • **Line** pays 5:1 • **Corner** pays 8:1
- **Trio** pay 11:1 • **Split** pays 17:1

These betting types are ordered by risk. Normally, betting on split bets (ie. 1/4) is very risky, but since we keep track of how long that combination hasn't come up, we are reducing our risk. I don't recommend you bet on Corner/Trio/Split until you have built up some extra cash!

'Wins Per Table' is the number of wins you are allowed at one table before RouletteSniper will force you to change tables.

'Play for x Minutes' is the amount of time RouletteSniper will allow you to play for at a given table.

'Minimum Wager' is how much you want to start your betting at. Starting out, you will be at \$1, but as you make more money, you will be able to wager \$6, enabling you to make \$150/hour.

'Per Spot' tells you what table you need to be betting at in order to utilize the selected wager.

'Minimum Balance' tells you the minimum amount of money you need in your account.

In Advanced Settings, you can adjust how long you want RouletteSniper to "sleep" on different betting sequences. The higher the risk of bet, the longer it should sleep. You can play with these numbers in Practice Mode to get a better understanding.

Conservative Betting cuts your risk in half. Since you start with a \$200 bonus, if you fall into a losing streak, you don't want to blow that \$200 all at once. And since the last half of the \$200 will go much quicker, it is better to cut off and start over. It will cut your loses at half your wager limit; in this case \$100.

Now it's time to start playing!

Position RouletteSniper under the Casino console like this and press Start.

Next you will Press Start, and the 'Press Start' will change to a flashing 'Spin Only'. Press the 'Spin' icon on the Casino console. Wherever the number lands, select the matching number up on the Playing Board and press 'Submit'. Keep doing this until the betting screen comes up.

When the betting screen comes up, follow the directions on where to bet. In this screenshot, it is telling you to bet \$1 on Odd (also indicated by a red chip icon), then spin. Select the number that comes up and simply press 'Submit'.

After a certain amount of wins or time, RouletteSniper will tell you to 'Switch Table/Press Start'. Follow these directions by pressing 'Switch Table' on the Casino console, and when it loads, press the 'Start' button, then make your spin.

If for any reason that RouletteSniper doesn't win through out all the betting, the 'Quit Now' screen will show. You will notice that your original \$200 is still in the Casino console account, and you can go withdraw it.

If you had Conservative Betting checked, you would have only lost half of your bank role, so now you can continue to play and recover the losses.

As you can see, there is a lot of potential cash here for you to win. I hope you have fun and take as much of the casino's money as possible.

If you want to manually restart the software, you can click File > Restart.

Roulette Killer - [DOWNLOAD THE TOOL FOR FREE FROM HERE](http://www.p2pheaven.com/roulettekiller.html)

If for some reason you can click on the link go to <http://www.p2pheaven.com/roulettekiller.html> and the download will start automatically.

What is Roulette Killer

Roulette Killer is my favorite roulette system. It's a cool piece of software that claims use the law of averages to tip the odds of winning in your favor. The software calculates over 100 factors in the background, filters them and spits out the most accurate prediction.

I can't comment on how accurate the softwares claims are, but I know from experience that the betting strategy alone is what make this software so great.

How Does Roulette Killer Work?

Roulette Killer is not like many of the progressive or martingale betting strategies many systems use.

With Roulette Killer your placing bets every spin, 5 bets per spin. You spin the wheel without betting for 10 spins and place your results into the software. After you do this, the software starts to generate predictions of the next spin.

Your only playing the outsides of the tables with this systems so the odds are more in your favor. You won't have to wait forever for the perfect betting opportunity like you many have with other systems.

You can win more with a system like this, although the same can be said about your losses.

How Well Does Roulette Killer Work?

I'm sure it varies from player to player but from my own experiences the software has worked well. At the end of the day, the only thing that matters is how much profit you are in, and I'm well in the green.

How Do You Use Roulette Killer?

Many criticisms with **Roulette Killer** is the lack of instructions on how to properly use the system.

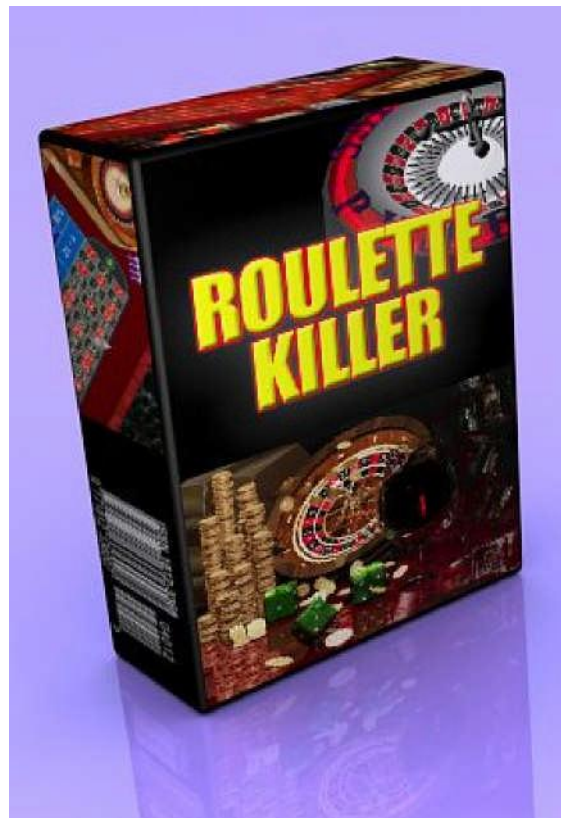

I myself am a more conservative player, although I have been known to go a little over the edge.

The reason I like roulette killer over the other softwares is I'm placing 5 bets a time every spin, in my case thats \$25 dollars per spin. Using the the systems betting strategy in many cases you only need to win 2 of your 5 bets to break even and you can even profit if 2 of the right bets hit. This happens often because your playing the outsides of the table, but its when you hit 3,4, or 5 of your bets the money starts to pile up rather quickly. In my opinion **Roulette Killer** is a must have.

[DOWNLOAD THE ROULETTE KILLER FROM HERE](http://www.p2pheaven.com/roulettekiller.html)

ROULETTE KILLER

SOFTWARE INSTRUCTIONS

[ROULETTE KILLER DEMO VIDEOS OVER HERE!](#)

By Andy Veerhoven, RouletteKiller.com
Thank you for ordering my «Roulette Killer» software!

INSTRUCTIONS

1. Open online casino site (Only use the casino in the autorun) and choose European Roulette game. Now open the **RouletteKiller software**.

2. Spin the roulette 10 times and record each result into RouletteKiller just by clicking on appropriate numbers in table.
3. Press «Calculate» button to calculate probable next spin result. Program will show you where to place the next bets and full statistics with probability of each bet.

Remember – program can't guess 100% of results and I also have losing sessions from time to time but the goal is to win good profit in long term.

[ROULETTE KILLER DEMO VIDEOS OVER HERE!](#)

TIPS & TRICKS FROM MASTER

1. Deposit the maximum cash in order to get the maximum bonus.

When you start out, deposit the maximum cash to rake in the maximum bonus. Play the rounds necessary to be entitled to withdraw your profits. Withdraw your capital + eventually the price for our software. From then on you will just gamble with house money.

2. Prepare to lose!

You will lose, that's 100% sure. Don't let yourself down, the software works. The YouTube videos you probably watched on the site are 100% real! Those are the days when the software and Lady Luck work together in perfect harmony :) Those days will happen too. Remember what I said earlier? MONTHLY profits. Always keep the big picture in mind.

3. Keep a tight money management

Never ever go on frenzy. Don't panic. When you start losing QUIT it. Call it a day go jogging, spend some time with friends, and come back tomorrow. The mind is very important here. Never ever bet all your money. I'm playing with only 5% of my bankroll on every bet. This rule is very hard. I used to break it myself too. It's dangerous, keep a cool mind and follow the system.

4. Don't spend what you can't afford to lose!

Please, be cautious when playing. If you have a family and kids and need to feed them make sure you have enough money power to come by. Even if the software is great and the money making potential awesome, it's still gambling.

5. Have fun!

You need to enjoy gambling. If using the software or gambling in general makes you nervous & sweaty please stop it immediately.

[ROULETTE KILLER DEMO VIDEOS OVER HERE!](#)

IMPORTANT ADVICES

- 1. You should use RouletteKiller on a demo account ("Play for fun") first. If you make money on the demo account and gain experience, only then go to a real money account.**
- 2. Do not play with large sums! It is better to make stable small income every day!**
- 3. Roulette Killer works perfect in casinos with honest MD5 systems. And the one you installed is perfect for this software. 100% tested.**
- 4. If you lost a bet try to double bet. But do not double more than 2-3 times, it is too risky!**
- 5. Try to find series of same types of numbers (for example 5-6 Black numbers in a row) and then start to make bets on Red using Roulette Killer advices.**
- 6. Do not make bets larger than 5-15% of your balance!**
- 7. Do not try to win more than 40% of your balance in 1 day!**
- 8. Roulette Killer is a great helper, but don't forget to think yourself before making real bets! Only you can be responsible for any losses. Remember - Online Casino is risky business with the potential for substantial losses. Do not spend what you cannot afford to lose.**

And at last but not least, enjoy the game and the thrill when playing!

Roulette System Checker - [DOWNLOAD THE TOOL FROM HERE](http://www.p2pheaven.com/roulettechecker.html)

If for some reason you can click on the link go to <http://www.p2pheaven.com/roulettechecker.html> and the download will start automatically.

USE THIS SERIAL TO CRACK THE SOFTWARE : FWVrscV2110704

The **Roulette System Checker** has been designed to help the gambler to work on their systems without having to outlay any money.

If you would like to start playing now, just read the QuickStart for basic instructions.

There are 2 types of Roulette wheel. The American wheel with (0,00) and the European wheel with only 1 (0). It is always better to play the European wheel as it only has 1 (0), that means that the house has the lowest advantage against the player.

With this program you are able to select a variety of betting units and you can play either the American wheel or the European wheel. This program is just like what you play in the casino.

The **Roulette System Checker**© keeps you up-to-date with information that you may need when working with your system.

Such as:

- Keeps a tally on the number of spins
- Tells you whether you are in Profit of Loss
- Keeps track of the amount you have bet for each spin
- Displays the amount in units of your payout when you have a win
- Shows you the last 10 numbers that have been spun up

Other Features:

- Play on American or European table
- A great random number generator
- Has a Reset Button to allow you to set all values to 0 and start again
- Bet in .25¢, .50¢, \$1.00 or \$5.00 units
- Realistic table limits, similar to a real casino

Future Additions:

- Will enable winning chips to remain on the table
- You will be able to program in your next bets in response to a win or loss for a selected number of spins

Any comments or suggestions would be appreciated.

This program may not be free of bugs, so please report any bugs to sydney@ans.com.au

Quick Start

Place your bets using the **LEFT** mouse button.

To cancel a bet, point to it and press the **RIGHT** button.

Once you have placed your bets press the **START** button. All wins will be credited to you and shown in the **Winnings** Display Box.

Table minimums are placed with the first mouse click.

Display Boxes

Each Display Box in the **Roulette System Checker**© supplies you with up to date information of your current session.

The **Spin Number** Display Box keeps a running total of how many spins there has been in your current session.

The **Winnings** Display Box indicates the current total of your Winnings or Losses.

The **Amount Bet** Display Box tells you how much you have bet for the next spin of the wheel.

The **Win Pay Out** box tells you how much in total units you are paid for the last spin result. It includes the initial chips you outlayed prior to the last spin.

The **Last Number** Display Box keeps a record of the last 10 results of the wheel.

The **Winning Number** display is where you will see the result of the last spin of the wheel.

When you press the **Reset** button ALL values will be set to 0

You can select the unit you would like to bet with, through the Menu Bar '**Select**' and then choose '**betting units**' then click on the unit type you want to use.

Check The System With This Great Tool And See For Yourself - It Really Works !!!

Rules of Roulette

There are 38 numbers on the American wheel and 37 on the European wheel.

As a player you can place any number of chips on the layout to allow you the chance to win if you happen to choose the number that is the same that is spun up by the dealer.

Here is a picture indicating the types of bets you can place on a Roulette table.

All pays are calculated according to the type of bet.

Payout Table

<u>Bet</u>	<u>Payout</u>
Straight Up	35-1
Split	17-1
Street	11-1
Corner	8-1
Sixline	5-1
Dozens	2-1
Columns	2-1
Outside Chances	1-1

Table Limits

Anytime you play Roulette at a Casino there will always be a table minimum bet and also a table maximum bet in place.

Minimum Bets

<u>Bet</u>	<u>Minimum</u>
Straight Up	1 unit
Split	1 unit
Street	1 unit
Corner	1 unit
Sixline	1 unit
Dozens	5 units
Columns	5 units
Outside Chances	10 units

If you are playing the \$5.00 unit. Table minimums on the Dozens and Columns bets are 2 units and on the Outside Chances the minimum bet is 5 units.

A click on the **LEFT** mouse button will place your minimum bet allowed.

Maximum Bets

<u>Bet</u>	<u>Maximum</u>
Straight Up	100 units
Split	200 units
Street	300 units
Corner	400 units
Sixline	600 units
Dozens	100 units
Columns	100 units
Outside Chances	200 units

If you try to bet over the table maximum a Message Box will inform you that you are trying to bet more than you are allowed.

\$200 Daily Roulette System - Now It's Time To Make Some Money!

Now that you have your account open and you have at least \$200 in it. Please follow the instructions below. You must NOT deviate from these instructions. Any deviation, whether big or small, can end in disaster. Therefore, it is very important that you read and follow the instructions carefully and do exactly as I outline. It will not take long to digest.

Before you are introduced to this system, we would like to provide you with some information that will help to build a clearer picture of what we are trying to achieve.

Not many people out there can win at roulette successfully. The reason for this is because the house edge is almost impossible to beat in a random scenario. You see, the odds at the roulette table are based on the "Law of Averages," minus one or two points. That way, when you're playing the table, the casino always has the odds on its side. This system works the law of averages and uses them to your advantage.

You may be thinking 'surely the casino will realize'. This is a perfectly rational thought when applied to traditional casinos, however, on-line there are literally millions of people playing, all over the world! If you consider the amount of people who are using this system to exploit this flaw you will be something like one in three million.

The System

The way this system works is that you lay bets on the Low / Middle / High rows of the roulette table. All you need to do in order to win is bet on the same one, with only a slight raise in stake each time until it wins. This may sound risky, but the bets and odds have been calculated for you to ensure that you are a winner every time, couple this with the fact that all we are betting is free money and you simply can't lose!

Now, these fields have a 1 in 3 chance of winning according to the "Law of Averages," and they pay a return of 2 to 1. So if you follow this system, you only need 1 in 14 in order to be a winner

(Depending on your balance). Doing this means that you've quadrupled the "Law of Averages" and you've given yourself an incredible advantage!

Another factor working in your favour is the casino software, which was programmed to rarely pick numbers from the same section of the table more than a few times in row. The intent of the developers was to avoid situations that might cause players to doubt the randomness of the game. By making sure that the game appeared random, however, the developers inadvertently built in an exploitable flaw that could allow an observant player to easily win.

And the beauty is that it's so simple!

THE BASICS

If you've never played roulette before, you need to understand what Low / Middle / High bets are.

The picture below is an example of a "Low" bet. If any number between 1 and 12 comes in, you win.

Now let's take a look at a bet on "Middle." If any number from 13 through 24 comes in, you win.

And lastly, let's take a look at a "High" bet. If any number from 25 through 36 comes in, you win.

Now, let's begin:

Click on the Roulette link to start playing. Next, click on 'Private Table' and then 'Standard' (min \$1 bet max \$300).

You will see the roulette table on your screen. You can spin the wheel as much as you like, even without betting (try it and see).

Notice how the winning number is indicated by a peg each time. You need to keep an eye on this peg.

Here's how you use your free \$200 to make even more money - follow this system EXACTLY.

As you can see the roulette table can be divided up into the first 12 numbers, second 12 numbers and the third 12 numbers. We will call these 1, 2 and 3 respectively for ease of use of this system.

You will be placing bets on one of these sets of 12 numbers. The odds on this are 2:1, so when we bet \$1 we get \$2 in winnings and our original \$1 back.

Let's start off with a simple pen and paper project. Now, what you're going to do is every time you spin the wheel, you'll record whether a Low (1), Middle (2) or High (3) drops in by writing down 1 if the winning number is in the first 12 numbers, 2 if the winning number is in the second 12 and 3 if the winning number is in the third 12 numbers.

Click to spin again, at the moment you are still not placing any bets.

When this spin ends record the in the form explained above. Say it was 26, this is in the third 12 numbers so we would write down 3. Now continue to do this, be sure to make a note of each number that drops in.

Let's say that you're at a table and 03, 11, 36, 16, 22, 26, 03, 34, 14, and 17 drop in.

You'll write down: **1 1 3 2 2 3 1 3 2 2**

Easy, right?

What your doing is waiting for 5 spins of the wheel where one of the sections of number has not come up. Once there has been 5 spins without one of the groups coming up, you start betting.

Let's say you spin the numbers **05, 10, 09, 15, 21.**

You would write down:

1 1 1 2 2

That means that 3 (the third set of 12 numbers) hasn't dropped in for 5 consecutive spins. It's time to start betting.

Patience is paramount here - a run of 5 spins without one of the groups coming up will happen, just keep spinning the wheel without placing any bets until it does.

How To Bet

On the bottom left part of the screen you'll see your chips - \$200 worth of them. There will be a gold heart by the pile of \$1 chips. Make sure that the gold heart is next to the \$1 chips before starting to bet. Click on the left of the row you want to bet on. Your \$1 chip will appear in this position (if you misplace it, right-click it to move it back to your bank).

So when we have 5 spins without one of the groups coming up we bet \$1 on the group that has not come up.

So, in the example given you would bet \$1 on HIGH. Spin the wheel.

So, what you're going to do is place \$1 on HIGH -- so if any number between 25 and 36 drops in, you win. You will win \$3 and be in profit \$2, now start the process again. Remember to include the winning number in your sequence of results.

If it doesn't land in HIGH, don't worry. Place a \$2 bet on High again -- and if it drops in, you win \$6 (which means you've made \$3 in profit).

Now if you still don't win, keep on betting using the staking plan below until you win.

Bet Number	Stake to Bet	Winnings	Profit
1	\$1	\$3	\$2
2	\$2	\$6	\$3
3	\$3	\$9	\$2
4	\$4	\$12	\$2
5	\$6	\$18	\$2
6	\$9	\$27	\$2
7	\$13	\$39	\$1
8	\$20	\$60	\$2
9	\$30	\$90	\$2
10	\$45	\$135	\$1
11	\$67	\$201	\$1

By doing this and sticking to the system above, you will never lose when your number drops in!

YOU MUST BE PRECISE, THOUGH!

When your number finally drops in, it's time to stop betting and beginning over by finding the sequence where either a low, middle, or high doesn't appear for 5 consecutive spins.

I would suggest you write this list of numbers on the sheet of paper you are recording this list of groups of numbers that come up.

IMPORTANT: As soon as you win, you go back to \$1 bets. Always keep a note of which group of numbers has not come up and when it gets to 5 spins, start betting.

WARNING - BE CAREFUL: When you win, you must stop betting, HOWEVER, the casino wants you to go on betting, so as soon as you win, it changes the 'Spin" button to a 'Repeat Bet' button. To counter this, just click anywhere on the board to place a \$1 bet, and then IMMEDIATELY 'RIGHT-CLICK' this chip to remove it again to your bank pile. You will now be able to spin again without betting.

Easy? Yes, but IT WORKS!

Now, you're probably thinking that the gains don't appear to be huge but the fact is that if you use this system, you will make a steady profit, hour by hour. There is a huge potential here if you just stick with the system. Believe me -- I should know. I've been using the system every day.

When you start off, you're not going to be making \$300 a day, obviously. What I want you to shoot for is to make \$80 to \$90. You should be able to do that in 60 to 90 minutes. This causes your bankroll to build up to the point where you can start putting more money down.

Final pointers – To help you along the way.

Here are some helpful pointers that I've learned along the way. Since I'm not a computer programmer, I can't explain why these things happen, only that they do.

1. Try not to spend more than 15-20 minutes at each table. I don't know why but after this amount of time, every table seems to get harder to play.
2. Switch casinos every 30-45 minutes, this greatly increases your winnings. We get great results doing this. Simply follow the same guidelines as above and you'll increase your profits even more. We have found **PARTY Casino** to be the next best casino for this system. By taking advantage of their bonus offers as well, you can use the bonus money to get started so you don't risk any of your own money. **To Take Advantage Of [PARTY Casino](#) Bonus Offer NOW!**
3. Always use a private table so you can spin the roulette wheel when you want to.
4. If you have been at a table for longer than 5 minutes and zero comes up when you are not betting, switch tables. If you are betting, just carry on with the system as normal until you win, then switch tables.
5. Don't play about 2 PM and 3 PM. I don't know why but the casinos seem harder to play during this particular hour.
6. Keep the money in your casino account until you have over \$500 then withdraw \$200 so always leaving at least \$300+ in your account.
7. Remember that you don't want to get greedy. This is where most players make their worst mistakes. What you need to do is set yourself a target amount stick to it. When you reach it, walk away and come back tomorrow.
8. You can only bet what you can afford to lose. That's common sense but you'd be amazed at how many people don't take this advice!
9. Maintain your discipline! This is the most important rule there is! Stick to the system and do not deviate!

Good luck and have fun!

P.S. - Still not sure? Well, think of it like this - what do you have to lose? By following these instructions EXACTLY, you are GUARANTEED to have \$500 to play with, without spending a penny of your own money! What's the worst that can happen? You spend two hours playing a game with someone else's money? You have absolutely NOTHING to lose, if you haven't already done so, **[click here](#)** to download the free casino software to play on-line roulette and give the system a try...you'll be glad you did!

This casino list consist of casinos on which the system and all the tools have been tested and hound working - please be sure to visit the casinos and check the bonuses and promotion offers they have for you as a new player. Use only the links on this list to be sure to get the best bonuses and promotions as we have an agreement with them with special offers for new players who comes from this list. These casinos have a tracking system that follows the origin of the player and where he came from. Once they see you came from this list you automatically get the special offers we have for you. Also check the casino's "promotions page" for the most updated latest offers they have.

Since I started playing at online casinos roulette I am constantly on the lookout for the best casinos to play at. After experiencing many online casinos, my favorite casinos are presented below. Why these and not others? My main criteria for judging a casino is payout percentages and bonuses. Plus, each casino that has made it into the list has passed my test for honesty, reliability and exceptional customer service. The trusted casinos below are the ones I both recommend, and play at myself.

[888 Casino-on-Net](#) - Since opening its virtual doors in 1997, 888.com's Casino on Net has been giving players the very best in safe, fun, and fair online casino entertainment. Experience the amazing games, a 100% sign up bonus - worth up to \$200, excellent 24/7 customer support, fast cash outs, and more! Play for real or play for free at the world's premiere casino on the net.

[Party Casino](#) - We recently revamped our European roulette table, making it one of the best in the business. Visit the table to take a look at the great new graphics and stay for the thrilling action. With only one zero, European roulette also gives you the best chance of winning big.

[Golden Palace Casino](#) - Get 300% more money! That's up to \$300 on the house, and a \$400 bankroll for spending only \$100! Don't miss out on this incredible offer!

[Grand Online Casino](#) - Make an initial deposit of \$25 to \$100 and get 200% MORE MONEY! That's up to \$200 in extra cash to TRIPLE your bankroll and WIN BIG. You won't find a better offer ANYWHERE...

[Online Casino](#) - Make an initial deposit of \$25 to \$100 using Neteller, myCitadel, Citadel, Click2Pay and get 300% more money! That's up to \$300 on the house, and a \$400 bankroll for spending only \$100! Don't miss out on this incredible offer!

[Vegas Red Casino](#) - Gets the top spot for the best payout percentage. Exceptional payout percentage (over 98%). Offers a generous bonus. An honest and credible casino. Great customer service.
